

Eastern Branch Seminar on Sustainability in the Pipeline Industry 15 September 2009 - Thorpe Wood House, Peterborough

'Humanity has the ability to make development Sustainable – to ensure that it meets the needs of the present without compromising the ability of future generations to meet their own needs.' Sustainability has become a key factor in modern world infrastructure development. This one-day seminar features a series of presentations and a site visit allowing the younger generation to explore the world of implementing sustainability in engineering.

Chris Newsome (Asset Management Director, Anglian Water): Keynote speech on the Importance of Sustainability to Anglian Water.

Dave Chadwick (Civil and Pipeline Engineering Manager, Anglian Water): Sustainability within the Anglian Water 5 year sewerage flooding programme with particular emphasis on Climate Change, Carbon Footprint as well as more general application of sustainability within the programme.

Sian Wilson (Consultant, Black & Veatch): The application of carbon footprint analysis to a number of project examples in addition to consideration of options for carbon reduction.

Steve Riches (Project Manager Biosolids Programme, Anglian Water): The Implementation of Anglian Water Biosolids Strategy to produce an enhanced treated biosolid product with the generation of renewable energy via Combined Heat and Power Plant (CHP).

The afternoon will be spent at Kings Lynn Sewage Treatment Works visiting the CHP Plant.
